EHR Your Way has the capability of exporting Electronic health information as CCDA and PDF documents.

Practice administrator can give access to the list of users to generate Electronic health information as CCDA and PDF documents. The standards used to generate the Patient Electronic health information are based on the HL7 Implementation Guide for CDA release 2: Consolidate CDA Template for Clinical Notes, Draft Standard for Trial use, Release 2.1. EHR Your Way will generate the complete Electronic health information as CCDA and PDF (computable).

### Single Patient Data Export:

User can select quantity of data required by selecting the date range, sections required for the clinical data and attachments or documents which include all electronic health information.

Bulk Export:

The user who has ability to perform Data export of EHI will have the folder on the Dashboard as "Data Export". User can choose the list of patients for whom Data export to be performed and select the path to save the data. This export will have the CCDA readable format, xml and PDF documents zip files by patient.

Below screenshot will help understand how to Select the patients and generate the CCDA.

#### Multiple Patient Data Export:

Dashboard→Generate Clinical Message (CCDA) for Multiple Patients

Step1: Click on CCDA from dashboard left folders.

CCDA Export

Step 2: Select "Data Export" from the drop down.

•	Dashboard	Inbox	Scheduler
